Tropical Weather Awareness

Tropical Weather Outlook

NWS National Hurricane Center Miami FL

800 AM EDT Thu Jun 15 2017

For the North Atlantic...Caribbean Sea and the Gulf of Mexico:

1. A tropical wave located several hundred miles south-southwest of the Cabo Verde Islands is producing disorganized showers and thunderstorms. Some gradual development of this system is possible during the next few days while the wave moves westward near 20 mph over the tropical Atlantic.

* Formation chance through 48 hours...low...10 percent.

* Formation chance through 5 days...low...20 percent.

2. A complex area of low pressure is expected to form over the northwestern Caribbean Sea and the Yucatan peninsula this weekend. Conditions appear to be favorable for gradual development of this system while it moves slowly northwestward toward the southern Gulf of Mexico by early next week.

* Formation chance through 48 hours...low...near 0 percent.

* Formation chance through 5 days...medium...50 percent.

Severe Weather Outlook

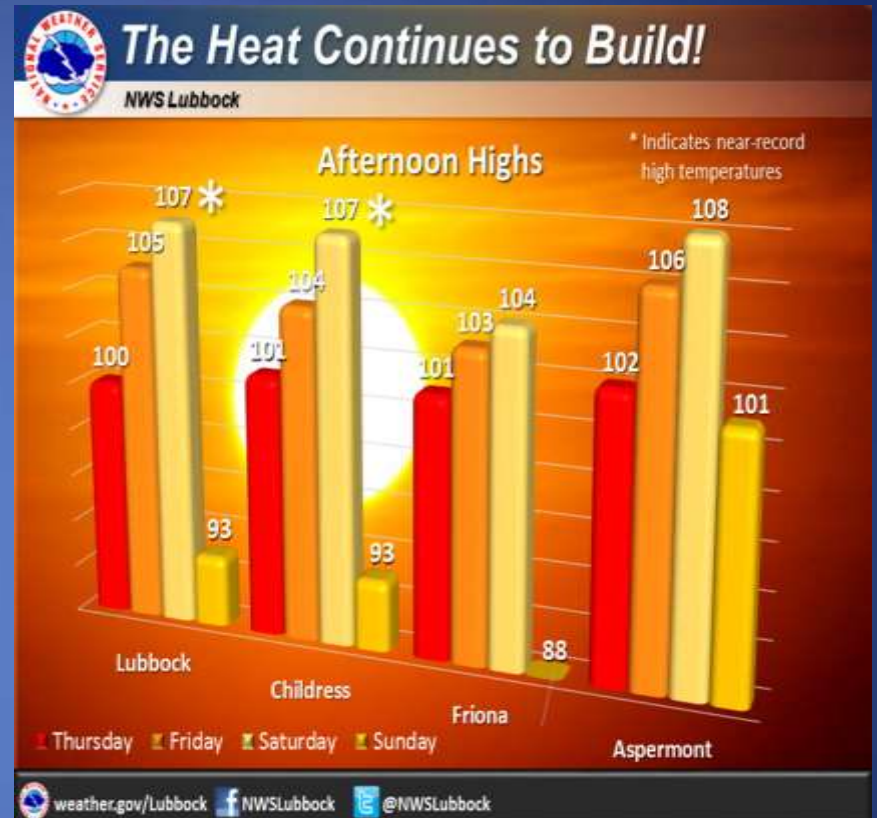

Thursday, June 15, 2017

Hazardous Weather

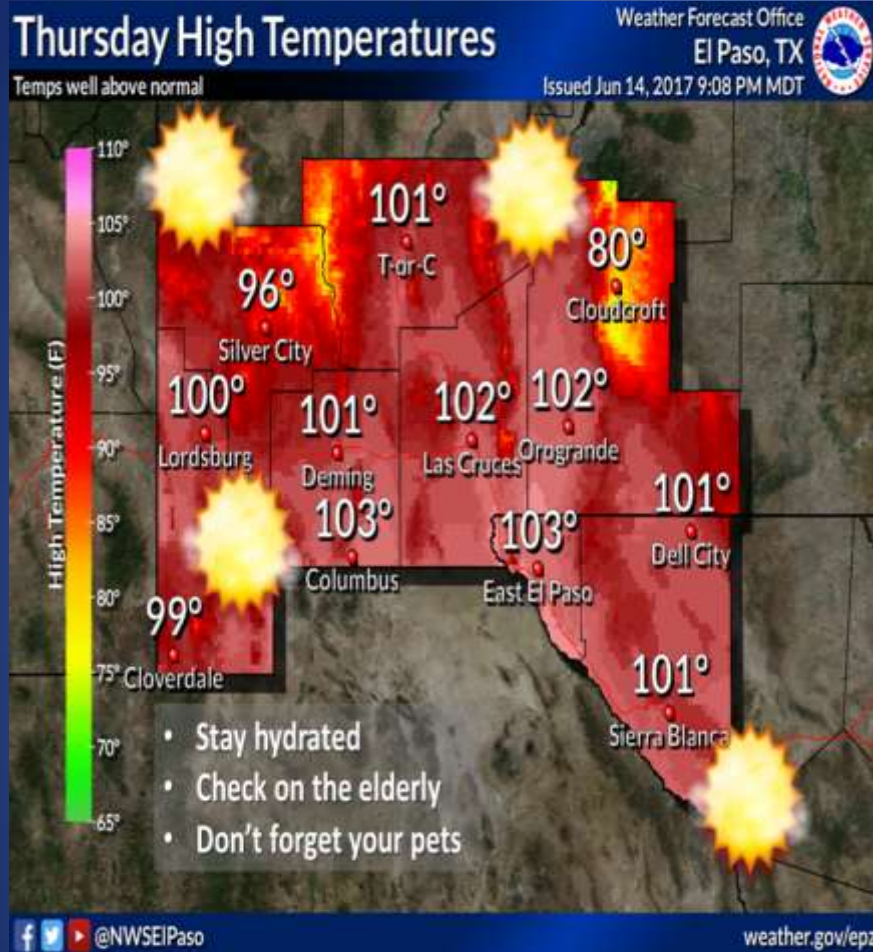

There will be a chance for thunderstorms this afternoon and evening, mainly across the eastern half of the Texas and Oklahoma Panhandles. There will be a slight risk for severe thunderstorms across easternmost sections, with large hail being the primary threat

The Summer Heat will continue to build across West Texas over the next few days. High temperatures will continue in 100 to 110 degree range. Most areas will likely remain dry, however a few thunderstorms could develop this afternoon and evening mainly across the Rolling Plains. Fortunately, a cold front may arrive on Sunday which could help to bring highs back down to near normal; upper 80s to lower 90s.

Hazardous Weather

We will see another day of hot temperatures. Most lowland locations will be at or a little above the triple digit mark. Even the mountains will see above normal temperatures. Remember to stay hydrated, check on the elderly and don't forget your pets.

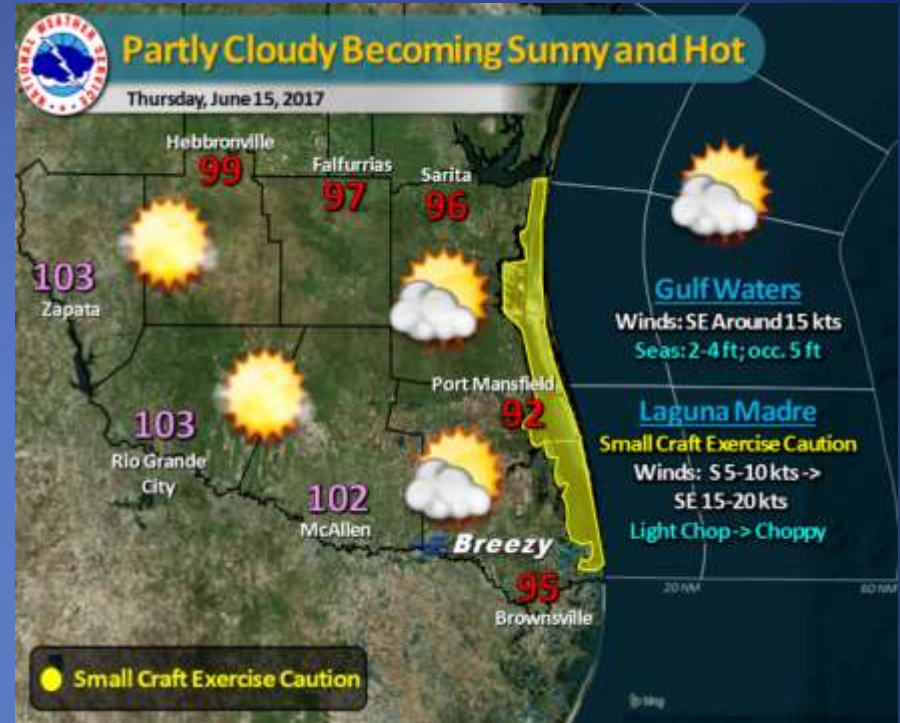

Hot weather will continue, but will promote the development of a few severe storms. Initially, storms out around Ft Stockton will have a chance to move and expand east and northeast.

Hazardous Weather

Another hot and humid day across South Texas. Heat indices back above triple digits with pockets of 105-109 degrees along the interior Coastal Bend and Rio Grande Plains. If traveling with children or pets today always be sure to 'Look Before You Lock'.

Partly cloudy skies in the morning becoming mostly sunny and hot today with breezy southeast winds. High temperatures this afternoon will range from the mid 90s to the low triple digits. Small craft should exercise caution on the Laguna Madre with a light chop on the bay increasing to choppy conditions. Expect seas of 2 to 4 feet and occasionally 5 feet across the Gulf waters out to 60 nautical miles.

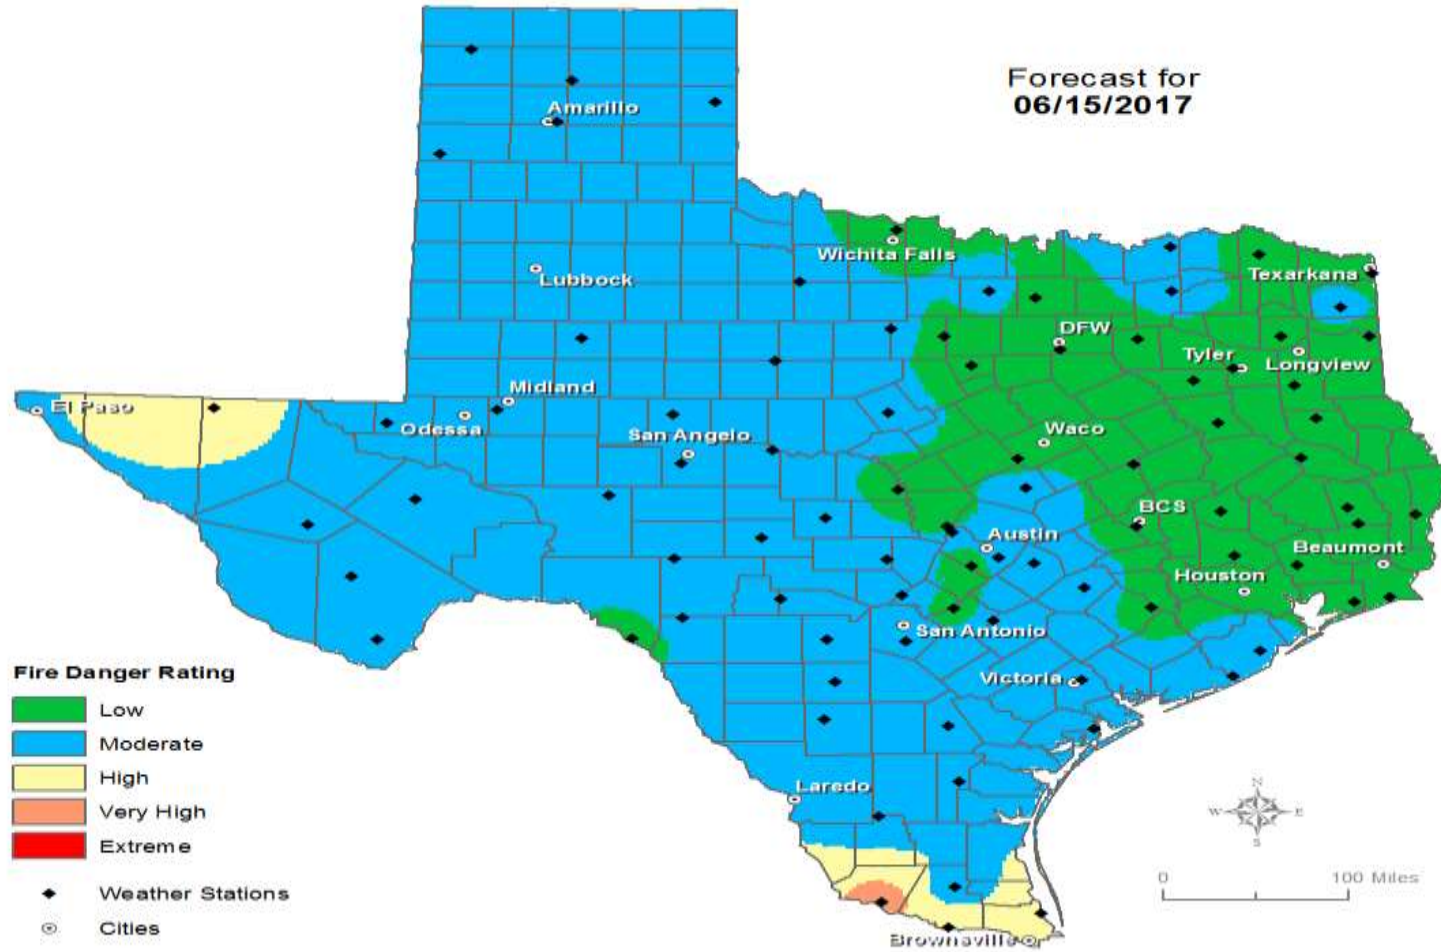

Weather Warning/Advisories Issued

DATE	WARNING TYPE	LOCATION
06/14/17	Severe Thunderstorm Warning	Andrews, Borden, Brewster, Crane, Dawson, Dickens, Ector, Howard, Kent, King, Martin, Midland, Mitchell, Pecos, Reeves, Scurry, Stonewall, Ward, Winkler Counties
